2. What does TTMS specialize in?

TTMS is an IT partner providing high-class services across the entire spectrum related to [software development and use](#). It uses modern technologies, including solutions based on artificial intelligence, increasing business readiness for changes. The company has appropriate licenses, certificates and a team of experts, which makes it a complete technology partner for demanding companies in demanding industries. Transition

Technologies MS has most established its position in [the defense and pharmaceutical sectors](#), which require appropriate licenses, security clearances and secured development and testing environments. He cooperates with clients based on long-term contracts, most often in the managed services model. It operates on foreign markets, where it is constantly expanding its structure and sales network. The goal of TTMS is to become a global IT service provider.

The basic services provided by TTMS are:

development and maintenance of IT systems

comprehensive project implementation

e-learning training

dedicated service centers

IT consulting

Among technologies and competences used by TTMS include: [Salesforce](#), [Adobe Experience Manager \(AEM\)](#), [cloud computing](#), [Microsoft solutions](#), [Enterprise systems](#), [Data Science](#), [Business Intelligence](#), and [low-code](#).

With the help of AI solutions, the company supports, among others:

- business processes (thanks to Webcon + AI synergy),
- business reporting (Power BI, Snowflake Data Cloud),
- HR processes,
- building low-code applications (Power-Apps).

The company has the status of an **R&D Center** in France, which is the result of cooperation with a long-time client - Schneider Electric. In the Malaysian market, it is a certified training provider of **the Human Resource Development Corporation (HRDC)**. The company attaches the highest importance to data protection and operates in a sustainable manner, as evidenced by regularly receiving quality certificates **ISO 27001** and **ISO 14001**, respectively.

3. Cooperation model

Serving both Polish entities and international corporations since 2015, TTMS has developed a complete catalog of cooperation opportunities, offering:

Managed Services (full responsibility of TTMS as a partner for the implementation and maintenance of IT services or systems)

Body Leasing (providing IT specialists with specific competences, in accordance with specific needs)

Team Leasing (building dedicated, specific project teams)

Project Fixed /T&M (project implementation at a price agreed in advance, regardless of changing needs)

Support (providing 2nd and 3rd line of support tailored to the client's needs)

TTMS works across cultures, with [13 offices in 4 time zones](#).

An organization that entrusts all activities to TTMS achieves financial and organizational savings. He can completely focus on the merits of his business, maintaining full control over the strategic assumptions of the project.

In such a cooperation model, which can be described as "managed services", Transition Technologies MS provides services, among others: for organizations such as **ABB, Pearson, Schneider Electric, Alstom, Pit-Radwar, Polish Medical Mission, European Space Agency (ESA), Bitronics and NATO**.

4. Competences and partnerships

TTMS has been developing competences for years, specializing in specific technological solutions. [Salesforce, Adobe Experience Manager \(AEM\), Microsoft and the design and creation of e-learning trainings](#) play a key role in the offer.

Programs in the following languages: Java, Spring, Hibernate, Java Script, React, Angular, Vue.js, CSS, HTML, Bootstrap, Node js, Python, .Net Web & Desktop (C#), C/C++, Mobile (Android, iOS, Hybrid), Ruby on Rails.
